# 10 KEY CYBER SAFETY TIPS

- 1 Never click on a link in an email until you validate the source
- 2 Never enter personal information in an email or text message
- 3 Use anti-virus software and keep it up-to-date
- 4 Limit web usage in the office to core, business-related sites
- 5 Make minimal use of unsecured, public networks
- 6 Create strong passwords and change them every 2-3 months
- 7 Do not use the same password for multiple accounts
- 8 Create separate email accounts for work, personal use, alert notifications and other interests
- 9 At home, set up a primary network and another for guests
- 10 Be prudent in what you share about yourself and your job via social media
